

COMPUTERIZATION OF PACS

*(AN INITIATIVE TAKEN BY MINISTRY
OF COOPERATION FOR THE
BETTERMENT OF PEOPLE)*

- **WHAT IS PACS**

COMPUTERIZATION ?

*PRIMARY AGRICULTURAL
CREDIT SOCIETIES are
grassroots Level of cooperative
societies serving rural areas.*

*Actually these societies managed
all their tasks using registers and
pens which were prone to
mathematical calculation errors*

and physical damage.

To shift this manual work to computerized online work

COMPUTERIZATION OF PACS

was introduced which means now

The project aims to digitize the day to day operations of PACS through common ERP software. They are improving so that all of the work can be shifted to online. By utilizing an

ERP-based Common National Software,

The core technical requirement of the computerization drive is to link the PACS directly to the District

Central Cooperative Banks (DCCBs) and State Cooperative Banks (StCBs), which

ultimately feed into [NABARD](#) local credit societies are upgraded with computers, printers, biometric devices, and secured networks.

The Core Purpose

The main purpose of this digitization drive is to dramatically improve the transparency, accounting, and service speeds of village cooperatives. In the past, keeping track of small farmer loans, deposit interests, and fertilizer allocations took weeks of manual calculation.

ELIGIBILITY

*To be eligible for the national computerization scheme, a society must be a **functional PACS, LAMPS, or FSS** with its **statutory audits completed** up to the preceding financial year. The Board of Directors must pass a **formal resolution** adopting the Model Bye-Laws and the **Common National ERP Software**. Finally, the society must have **basic operational infrastructure** (active electricity and a regular, salaried Secretary) and receive official selection approvals from both the **DLIMC and SLIMC**.*

BENEFITS PROVIDED:

Improved digital transaction record:

Subsidies and government funds are sent straight to farmers' linked bank accounts without middlemen.

Faster Loan Processing: *Short-term crop loans are calculated and disbursed almost instantly through automated credit limits.*

Complete Financial Transparency:

Members receive automatic SMS alerts and printed digital receipts for every single transaction, removing manual errors.

Access to Multiple Services: *Farmers can*

access diverse services like fertilizer distribution, quality seed storage, and custom hiring centers under one roof.

Lower Transaction Costs: *Eliminates the need for farmers to travel long distances to commercial banks for basic financial services.*

DOCUMENTS REQUIRED

- ***Statutory Audit Report:***

A certified copy of the completed statutory audit report for the immediate preceding financial year. [[1](#)]

- ***Special Pre-Audit / Trial Balance***

Sheet: *Updated books of accounts indicating finalized **opening balances** required to migrate data onto the common national ERP system. [[1](#)]*

- ***Resolution of the Board/Management Committee: A***

formal resolution passed by the PACS Board of Directors expressing their willingness to onboard the national software and adopt the Model Bye-Laws. [\[1\]](#)

Employment Record of the Secretary:

Employment

contract, appointment letter, or recent salary slips proving that the PACS Secretary/CEO is a regular, salaried employee.

Staff Computer Literacy Certificates: *Academic diplomas, training certificates, or formal self-declarations proving that the designated operational staff are computer literate and ready for ERP training modules.*

DLIMC & SLIMC Selection Approvals: *Formally signed selection and recommendation letters from the District Level Implementation and Monitoring Committee, verified by the State Level Committee. [\[1\]](#)*

- ***PACS Registration Certificate:***

The primary legal document proving the society is officially registered under the State Cooperative Societies Act.

- ***Bye-Laws of the Society: A***

certified copy of the approved corporate by-laws detailing the operational rules of the PACS.

- ***Electricity Connection Bill:***

Proof of an active power grid connection at the PACS office

premises

Different areas, projects, phase may have different documents required please access official portal according to different criteria.

PROCEDURE

- ***Check the Rules:*** Make sure your society is active, has audited accounts, and has working electricity and internet.
- ***PACS board passes the required resolution:*** Hold a meeting with the society leaders to sign a paper saying everyone agrees to use the new computer system.

- **Hand in Papers:** Give your society's registration papers and the signed agreement paper to DCCB, StCB district authority or implementing agency.
- **Pass District Check:** Wait for the district committee to check your office and select your society for the program.
- **Get State Approval:** Wait for the higher state committee to give the final official okay to upgrade your office.
- **Get hardware support:** the technical team who will deliver and set up free computers, printers, and battery backups at your office.
- **Learn and Type Data:** Attend free training lessons to learn the new software while typing your old paper

records into the computer.

- *It is not universal procedure may be different in other states*
