

ICDP Overview

The Integrated Cooperative Development Projects (ICDP) is a landmark district-level scheme.

It operates under the Ministry of Cooperation to promote overall rural development.

The main purpose is to transform rural economies through robust cooperative networks.

It aims to bridge infrastructure gaps across agriculture and allied sectors.

Core Objectives

To diversify cooperative activities into marketing, processing, and storage.

To strengthen primary cooperative societies operating at the grassroots level.

To introduce modern technology and electronic systems to local networks.

To improve financial viability and business volume for rural farmers.

Scheme Eligibility

Selected districts approved under the central cooperative framework are eligible.

Registered cooperative societies working within chosen districts can qualify.

Functional multi-purpose societies showing structural growth potential may apply.

Agriculture, dairy, fishery, and handloom cooperative groups are covered.

Benefits Provided

Substantial financial assistance for building storage godowns and cold chains.

Institutional share capital to strengthen society borrowing capacity.

Subsidy support for purchasing modern office equipment and computer software.

Dedicated training grants to upskill managerial staff and rural members.

Required Documents

Official cooperative society registration certificates and bylaws document.

Detailed Project Report or DPR outlining infrastructure development goals.

Audited financial accounts covering the last three consecutive financial years.

District planning committee recommendation letter and village location map.

Process Part 1

1. District planning cells prepare a comprehensive district development proposal.
2. Local cooperative societies submit their detailed infrastructure requirements.
3. State level committees evaluate the technical feasibility of proposals.
4. NCDC reviews and sanctions funds to the respective state government.

Process Part 2

5. State government releases funds directly to the cooperative societies.

6. Societies execute the project infrastructure work as per approved DPR.

7. District authorities monitor progress and submit utilization reports.
