

1. NCDC OVERVIEW

The Assistance to NCDC Programmes for Development of Cooperatives is a robust framework managed by the Ministry of Cooperation. It provides financial backing to cooperative institutions across the nation. The primary aim is to plan, promote, and finance cooperative activities focused on production, processing, marketing, storage, and import-export of agricultural produce and notified commodities.

2. ELIGIBLE SECTORS

Financial assistance covers multi-dimensional sectors such as marketing, processing, and large storage facilities. Special sub-schemes target agro-processing, dairy management, cold chain infrastructure, and spinning mills. It also focuses on weaker section cooperatives, handloom units, fisheries, and the extensive computerisation of Primary Agricultural Credit Societies (PACS) to modernize grassroot operations.

3. COOP ELIGIBILITY

To access funding, a cooperative must be legally registered under State or Multi-State Cooperative Acts. The applicant society must show a clean financial track record with fully audited books for the preceding three financial years. Viable proposals from women-led cooperatives and societies operating successfully for more than three years receive priority evaluation and customized financial processing.

4. BENEFITS AND PATTERN

The scheme offers long-term loans covering up to 90% of total project costs with highly competitive interest rates. Capital subsidies are structured to correct regional imbalances across individual states:

- Least Developed States: 25% subsidy.
- Under-Developed States: 20% subsidy.
- Developed States: 15% subsidy capped at Rupees 5 crores.

5. REQUIRED DOCUMENTS

Applicants must submit an official registration certificate alongside updated bylaws translated into English or Hindi. A comprehensive Detailed Project Report (DPR) highlighting physical targets and cash flow patterns is mandatory. Societies must provide three years of audited balance sheets, credit history documents, bank account passbooks, and clear board resolutions approving the loan.

6. PROCEDURE - STEPS 1-4

1. Form Formulation: Collect the standardized schematic application directly from the NCDC regional center or web portal.
2. DPR Drafting: Engage certified experts to build a deep feasibility study and technical project design report.
3. Board Clearance: Pass an official resolution inside the cooperative board endorsing the loan amount and asset security.
4. State Route Option: Submit the formal file to the State Registrar of Cooperative Societies for administrative recommendation.

7. PROCEDURE - STEPS 5-7

5. Direct Submission: Alternatively, eligible healthy cooperatives can apply directly to NCDC under the direct funding channel.

6. Field Appraisal: NCDC functional divisions perform on-the-spot physical validation of assets and repayment capacity.

7. Sanction & Disbursal: Following approval, funds are released on a reimbursement model based on real physical progress.
