

UNDER MINISTRY OF

COOPERATION:

PRADHAN MANTRI MATSYA

SAMPADA YOJANA..

1.PURPOSE

- PMMSY stands for Pradhan Mantri Matsya Sampada Yojana, a flagship scheme launched by the Government of India.
- It represents a massive investment of over twenty thousand crore rupees dedicated entirely to the fisheries sector.
- The core vision is to drive ecologically sustainable development while boosting the rural marine economy.
- It targets a substantial expansion in fish production and enhancement of

productivity across all states.

- The program actively addresses gaps in the commercial harvest value chain from capture to market distribution.
- It modernizes standard fishing practices through cutting-edge technology adoption and digital mapping.
- The initiative strives to enhance traceability and global competitiveness of Indian seafood exports.
- It emphasizes social safety, robust insurance coverage, and secure income avenues for coastal families.
- It aims to establish reliable governance framework for marine, inland, and ornamental aquaculture.
- Special focus is placed on optimal resource utilization across inland open waters and deep-sea territories.

2. ELIGIBLE BENEFICIARIES

- Active traditional fishers, fish workers, and community fish vendors across coastal and inland regions.
- Progressive individual fish farmers and independent local agri-entrepreneurs running aquaculture setups.
- Registered Primary Fisheries Cooperative Societies and local multi-purpose rural cooperative associations.
- Specialized Fish Farmers Producer Organizations and formal corporate entities engaged in seafood processing.
- Local Self-Help Groups and Joint Liability Groups operating within the domestic

fisheries supply chain.

- Public sector state fisheries development corporations and federally managed aquaculture federations.
- Dedicated Scheduled Caste and Scheduled Tribe beneficiaries looking to start fresh aquaculture ventures.
- Women entrepreneurs and women-led groups managing local post-harvest sorting and retailing units.
- Differently-abled individuals seeking livelihoods in ornamental fish breeding or backyard aquaculture.
- Notified commercial entities fulfilling specific guidelines set by the Department of Fisheries.

3. PERMISSIBLE

INFRASTRUCTURE PROJECTS

- Establishment of modern cold storage units and specialized ice plants near major landing centers.
- Construction of sophisticated Re-circulatory Aquaculture Systems for high-density indoor fish farming.
- Deployment of deep-sea fishing vessels and technology upgrades for existing traditional motorized boats.
- Setup of automated fish feed mills to ensure availability of quality nutrition for commercial farms.
- Construction of new brackish water ponds and advanced freshwater hatchery production systems.
- Development of integrated smart fishing harbors and hygienic fish landing centers with modern amenities.

- Installation of open-sea cages, reservoir cages, and dedicated seaweed cultivation infrastructure loops.
- Procurement of refrigerated transport vehicles and insulated vans for fresh seafood distribution.
- Setup of vibrant ornamental fish rearing units and organized e-marketing retail kiosks across urban centers.
- Establishment of Matsya Seva Kendras to serve as one-stop technical solution centers for local farmers.

4. FINANCIAL SUBSIDIES **& FUNDING**

- General category individual beneficiaries receive a standard capital subsidy of forty percent of unit cost.
- Special categories including Scheduled

Castes, Scheduled Tribes, and Women receive sixty percent subsidy support.

- The remaining financial share is contributed directly by the beneficiary via own funds or bank term loans.
- For Central Sector components, the entire project expenditure is fully funded by the Central Government.
- For Centrally Sponsored components, funding is split between the Central Ministry and the respective State.
- The operational funding pattern for standard non-Himalayan states follows a sixty-to-forty center-state ratio.
- The funding pattern for North-Eastern and Himalayan states follows a ninety-to-ten center-state ratio.

- Union Territories receive one hundred percent funding support directly from the Central Government budget.
- Special financial aid of three thousand rupees per annum is extended to fishers during seasonal fishing bans.
- Capital subsidy disbursements are strictly linked to milestones and managed transparently via direct bank transfer.

5. STEP-BY-STEP APPLICATION ROADMAP

- STEP 1: Visit the official state fisheries portal or contact the nearest District Fisheries Office.
- STEP 2: Review the specific component criteria and download the official project application template.
- STEP 3: Formulate a detailed project

proposal specifying technical, financial, and environmental parameters.

- STEP 4: Ensure necessary land ownership deeds, lease agreements, or statutory water area permissions are ready.
- STEP 5: Apply for an official bank loan sanction if the project relies on external commercial credit.
- STEP 6: Submit the complete physical or digital application package to the local processing authority.
- STEP 7: The District Level Committee conducts comprehensive technical screening and physical site verification.
- STEP 8: Approved proposals are formally forwarded to the State Level

Approval Committee for final screening.

- STEP 9: The central ministry issues administrative sanction numbers and releases the initial funding tranche.
- STEP 10: Implementation begins under regular supervision of the Project Monitoring and Evaluation Unit.

6. REQUIRED CHECKLIST & DOCUMENTS

- Valid government identity proof of the applicant such as Aadhaar Card or Voter Identity Card.
- Official residential proof or entity registration certificates issued by authorized local bodies.
- Comprehensive Detailed Project Report containing complete financial and

engineering cost estimates.

- Documented proof of absolute land ownership or registered long-term land lease contracts for the site.
- Valid active fishing license or boat registration details for capture fishery modernization support.
- Official bank account statements for the last six months along with clear canceled check copies.
- Signed affidavit confirming non-duplication of central funds for the exact same project location.
- Category proof certificates for applicants seeking the sixty percent Scheduled Caste or Tribe subsidy.
- Formal bank loan sanction letters for credit-linked infrastructure

components exceeding basic thresholds.

- Statutory clearance certificates from local pollution boards and environmental authorities where needed.

7. FREQUENTLY ASKED QUESTIONS

- Q1: Can a local primary fisheries cooperative society apply?

Yes, all registered cooperatives are eligible.

- Q2: What is the maximum project limit for individuals?

It varies per component as per specific unit costs.

- Q3: Is there a strict age criteria?

Yes, individual applicants must be

between eighteen and sixty years old.

- Q4: Can a single person execute multiple projects? No, a beneficiary is limited to one project unit.

- Q5: How is the subsidy amount disbursed?

It is transferred electronically directly to the linked bank account.

- Q6: What projects are covered under post-harvest?

Cold chains, insulated transport vans, and retail fish markets.

- Q7: Who monitors the project execution? The official district teams and the central Project Monitoring Unit.

- Q8: Is commercial insurance mandatory?

Yes, assets created must be properly

insured against natural disasters.

- Q9: Where can I access official operational templates? On the official Department of Fisheries central portal.
- Q10: Does it cover seaweed cultivation? Yes, extensive capital subsidies are available for open-sea seaweed rafts.
