

SUB-MISSION ON AGRICULTURAL MECHANIZATION

Scheme Type: This initiative represents a comprehensive farm mechanization support scheme deployed under a centralized framework.

Primary Purpose: The core objective is to significantly promote and expand widespread access to modern, high-tech agricultural machinery.

Operational Efficiency: It aims to introduce efficient mechanization procedures across varied agricultural zones to optimize resource utilization.

Cost Optimization: The mission works toward reducing the heavy cost of manual farm labor, improving overall productivity timelines, and enhancing the financial output for farming families.

ELIGIBILITY CRITERIA

Eligible Farmers: Small, marginal, and individual land-owning farmers across all regional states can apply for direct benefits.

Farmer Groups: Registered self-help groups (SHGs), joint liability groups, and dedicated farmer interest groups are fully eligible.

Cooperative Institutions: Primary Agricultural Credit Societies (PACS) and large farming cooperatives qualify for setting up hubs.

Defined Categories: All other specific categories defined clearly by the current active SMAM guidelines and regional state implementation plans are included.

BENEFITS AND SUPPORT

Machinery Subsidies: Direct financial support is systematically provided to lower the procurement costs of modern agricultural machinery.

Custom-Hiring Models: Special service and operations models are actively funded to establish accessible machinery rental hubs.

Custom-Hiring Centres (CHCs): Large assistance grants are provided to scale up village-level farm machinery banks for localized operations.

High-Tech Machinery Hubs: Dedicated high-tech machinery packages are highly subsidized to enable efficient, large-scale modern farming solutions.

STEP BY STEP PROCEDURE

Step 1: Portal Registration - The applicant must first access the official centralized agricultural mechanization portal to create a secure user profile.

Step 2: Documentation Upload - Upload clear digital copies of mandatory identity proofs, verified land ownership records, and active activity details.

Step 3: Equipment Selection - Choose the specific machinery models or custom-hiring project packages directly from the approved manufacturers' list.

Step 4: Department Verification - State agricultural department officials review the project files, inspect eligibility, and grant formal online approval.

Step 5: Procurement and Subsidy - Purchase the machine from authorized dealers, upload verification receipts, and receive the subsidy via Direct Benefit Transfer.

DOCUMENTS AND DATA REQUIRED

Identity Proof: Valid government-issued farmer identity cards, such as Aadhaar cards, voter IDs, or official registration numbers.

Land Records: Verified land ownership documentation, cultivation certificates, or clear operational activity statements.

Project Proposals: Detailed business plans and specifications for setting up large custom-hiring centers or farm machinery banks.

Bank Details: Active bank account information and linked credentials required for the direct processing of financial subsidy payments.

TYPICAL SIA QUESTIONS AND ANSWERS

Question 1: What is SMAM?

Answer: It stands for the Sub-Mission on Agricultural Mechanization, a central flagship scheme designed to make farm machinery accessible to small, marginal, and resource-poor farmers across the country.

Question 2: Which farm machinery is supported?

Answer: The scheme supports a wide spectrum of machinery, including tractors, power tillers, combine harvesters, laser land levelers, specialized drone systems, and

advanced crop residue management equipment.

Question 3: Can a cooperative run a custom-hiring centre?

Answer: Yes, cooperative societies, Primary Agricultural Credit Societies (PACS), and Farmer Producer Organizations are fully eligible to establish and manage custom-hiring centers with high-percentage subsidies.

OFFICIAL SOURCE FAMILY

Ministry of Cooperation: Governs the integration frameworks, especially for Primary Agricultural Credit Societies (PACS) utilizing mechanization funds.

PACS DPR Implementation:
Coordinates with detailed project reports to build convergence models for structural equipment funding.

Ministry of Agriculture: Functions as the nodal central authority providing the foundational operational guidelines and financial budget allocations.

Convergence Resources: Merges various central and state resources to maximize agricultural growth, infrastructure development, and localized farm power.
