

MINISTRY OF COOPERATION INITIATIVE

Main Heading

PACS Diversification & Fuel Dealership
Priority Pathway

Type

This initiative is a strategic **PACS diversification initiative** designed to expand the operational scope of Primary Agricultural Credit Societies beyond traditional banking and credit services.

Status

It is currently **recommended to add** this priority mechanism into the standard allotment rules, marking a policy shift to strengthen the cooperative sector's economic footprint.

Purpose

The primary goal is to **give eligible PACS a priority pathway** within the applicable petrol and diesel dealership selection frameworks, ensuring cooperatives get fair representation in fuel distribution networks.

Eligibility

All interested societies must be **eligible PACS subject to current dealership guidelines** and must satisfy the specific terms, financial health metrics, and land requirements set by the respective **oil-marketing companies (OMCs)**.

Benefits / Support

This scheme unlocks a major **potential diversification and rural service delivery opportunity**, allowing PACS to boost their revenues while providing essential, high-quality fuel directly to rural

communities.

How to Apply / Access

Societies can apply **through the current dealership selection or advertisement process** officially released by the concerned oil-marketing company, following the standard public notice timeline.

Documents / Data

Applicants must submit valid **PACS institutional records**, land ownership or lease proofs, registration certificates, and all other **application documents prescribed in the dealership process**.

Typical SIA Questions

Common Social Impact Assessment queries include: "**Can a PACS get petrol/diesel dealership priority?**" and "**What are the operational and land**

conditions required to qualify?"
