

1. AHIDF PURPOSE & VISION

- The Animal Husbandry Infrastructure Development Fund is a major central sector program approved up to 2026 under the DAHD structural network framework.
- It establishes specialized funding mechanisms to drive infrastructure expansion across meat production, dairy management, and technological processing.
- It prioritizes substantial value addition systems to scale local manufacturing while reducing processing losses across national livestock supply loops.
- Key goals focus on creating robust processing setups to enhance product safety, value matrices, and regional market connectivity benchmarks natively.

- The fund stimulates private capital inflows to convert smallholder traditional operations into highly efficient commercial enterprises.
- To view official announcements, explore the authorized central portal managed on the [DAHD Scheme Website](#).

2. ELIGIBILITY CRITERIA

- Individual entrepreneurs, rural youths, and private entities seeking to set up commercial animal husbandry units qualify under current directives.
- Organized Farmer Producer Organizations (FPOs) and large-scale agricultural collectives are fully incentivized to build corporate value chains.
- Registered Micro, Small, and Medium Enterprises (MSMEs) can seamlessly access the fund to establish modern processing facilities nationwide.
- Section 8 non-profit organizations and specialized dairy cooperative networks are explicitly integrated as valid scheme implementation partners.

- Private limited corporations and joint venture firms can leverage institutional support to deploy state-of-the-art animal welfare infrastructure.
- Verify complete stakeholder parameters and compliance updates via the live portal at the [AHIDF Udyamimitra Portal](#).

3. QUALIFYING PROJECTS

- Setup of modern milk processing loops, automatic milk collection systems, cold chain logistics nodes, and product manufacturing infrastructure units.
- Establishment of automated poultry processing plants, integrated meat processing facilities, and standalone value-added processing systems.
- Deployment of state-of-the-art animal feed manufacturing factories, total mixed ration plants, mineral mixture units, and testing laboratories.
- Development of advanced veterinary drug production networks, animal vaccine manufacturing setups, and automated bio-waste management units.

- Creation of technically integrated breed multiplication centers, bovine embryo transfer labs, and modern multi-species breeding stations.
- Track all approved components and equipment lists by checking the official data guide at the [PIB AHIDF Notification](#).

4. BENEFITS & ASSISTANCE

- The scheme offers credit-linked financial assistance covering up to 90% of the complete estimated project setup costs through scheduled commercial banks.
- Borrowers receive an annual interest subvention of 3% directly applied on eligible term loan facilities for up to 8 years of active repayment.
- Micro and small enterprises benefit from a low 10% minimum margin money contribution threshold to ensure access for smallholder businesses.
- Medium scale enterprise models require a 15% margin contribution, while other private commercial categories scale up to a 25% margin.

- A dedicated 25% credit guarantee cover is extended through NABARD and CGTMSE to back institutional credit without demanding heavy collateral assets.
- Review precise interest caps and financial configurations listed officially within the [Vikaspedia Scheme Framework](#).

5. STEP-BY-STEP PROCEDURE

- Step 1: Access the digital dashboard and register your profile on the authorized central management interface to generate tracking credentials.
- Step 2: Upload a comprehensive Detailed Project Report (DPR) explaining technical operations, market viability parameters, and cost estimates.
- Step 3: Complete structural field appraisal reviews handled directly by your selected scheduled commercial lending institution.
- Step 4: The Ministry of Animal Husbandry performs electronic documentation verification to confirm administrative criteria matching.
- Step 5: Secure formal loan sanction letters alongside credit guarantee enrollment

markers managed through automated backend pathways.

- Step 6: Begin direct electronic fund drawdown stages after logging your updates inside the [Udyamimitra Application Hub](#).

6. MANDATORY DOCUMENTS

- Formulate a comprehensive Detailed Project Report (DPR) breaking down itemized capital expenditures and revenue forecasts clearly.
- Submit authorized institutional registration certificates, organization articles, KYC records, and active pan card documents.
- Present verified land ownership deeds, clear structural site possession certificates, or long-term registered lease agreements.
- Furnish three years of certified audited balance sheets, corporate bank statements, and relevant tax compliance filing records.
- Provide valid environmental clearance certificates, local municipal building approvals, and tech vendor machinery quotes.

- Access localized checklist templates and regional variations directly on the [State DAHD Portal](#).

7. STRATEGIC SCHEME FAQs

- Question: Can active agricultural cooperatives or FPOs apply? Answer: Yes, all cooperative federations and FPOs are fully eligible entities.
- Question: What is the maximum tenure for loans under the scheme? Answer: Up to 10 years including a built-in principal moratorium of 2 years.
- Question: Is there an explicit upper loan limit for projects? Answer: There is no rigid upper or lower financial barrier for viable projects.
- Question: How is the interest subvention processed? Answer: The central department passes the 3% subvention directly to the bank natively.

- Question: Are default accounts eligible to continue? Answer: Defaulters lose interest subvention benefits for that given cycle immediately.
- Cross-verify all institutional rules, loan products, and regulatory security norms on the [SBI AHIDF Product Portal](#).
